 **WIRELINE TRUCK FAB**

WHO WE ARE...

“By keeping our overhead expenses down, more of your dollars go directly into your equipment.”

Billy Smith - Owner

Wireline Truck Fab LP was established in 2004. We have been in the wireline industry since 1974 and have actual field experience as operators, owners, and manufacturers. We use our experience and knowledge to provide what you want, and what you need, at the most economical price. As a small company, we can assure our customers, they will receive personalized attention from the top down. We work closely with independent wireline companies to insure all equipment meets their specifications.

Wireline Truck Fab builds quality wireline units at a competitive price. By keeping our overhead expenses down, more of your dollars go directly into your equipment.

Wireline Truck Fab designs and manufactures open-hole, cased-hole, slick-line and fiber-optic units. In addition to traditional wireline trucks, we offer a complete line of custom designed trucks, skid units, trailers, combination trucks and frac units. We also manufacture custom designed Specialty Trucks, Trailers and Skids.

We create and use Computer Assisted Drawings and Blueprints to insure that every part of the unit is manufactured to the highest standards and best quality.

We understand, sometimes a refurbished truck makes more sense. We will rebuild your truck bumper-to-bumper, or to whatever stage of completion you desire.

FIBER OPTIC...

we build what the customer requests ◆

◆ You describe it. ◆ We design it. ◆

◆ You approve it. ◆ We build it. ◆

LETTER FROM BILLY...

“By keeping our overhead expenses down, more of your dollars go directly into your equipment.”

Billy Smith - Owner

I began working in the wireline business in 1974 for a major wireline company in south Texas. In 1981, I started an independent wireline company and began building my own wireline trucks. I was repeatedly asked, “Who built your trucks?” I quickly discovered there was a need for someone to build quality, affordable wireline trucks. I felt I could provide that service. So , in 2004 I sold my wireline company and started Wireline Truck Fab.

We don't have a fancy building and offices. What we do have is the equipment and knowledge to manufacture quality wireline units. By keeping our overhead expenses down, more of your dollars go directly into your equipment.

Wireline Truck Fab now has trucks, trailers and skid units in all oil producing states and seven countries. We work hard to make sure that ALL of our customers are very satisfied.

With over 35 years in the Wireline Industry, we have the hands-on experience and knowledge that our customers need and expect. We pride ourselves on getting your equipment completed as quickly as possible. We can do any and all repairs and modifications needed to provide our customers with the Highest Quality, New and Refurbished Wireline Trucks in the field today.
